# We Redefine the Way Photos Are Shared!

Discover Event Photos, the solution that makes it fast and effortless to deliver event photos to the right people. With its advanced technology and user-friendly interface, take your event experience to the next level.

# Face Recognition System Features

## Advanced Facial Recognition

The AI-powered Facial Recognition System detects and converts human faces into digital data. It analyzes distinctive facial features such as the eyes, nose, mouth, and jawline, while also evaluating factors like lighting, shadows, head position, and facial dimensions to create a unique **“face map”** for each individual.

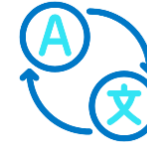

## Fast Processing Time

Thanks to secure and high-speed technologies, each face is scanned, analyzed, and instantly matched with the corresponding data in the database within seconds.

## Unmatched Security and Reliability

Personal data is processed and stored with the highest level of security measures. All operations are carried out in accordance with user consent and legal requirements. This approach plays a vital role in ensuring the protection of personal information.

## 21 Language Support

Offering support for 21 languages, Event Photos eliminates language barriers at events held around the world. Event organizers can create events in multiple languages, and attendees can access their photos in their preferred browser language via a single link or QR code.

## Analytics and Reporting

Gain access to comprehensive reports on various metrics such as the number of event participants, uploaded photos, and images matched through facial recognition. Event Photos provides detailed analytics to help you evaluate performance and gain valuable insights.

# How Does It Work?

## 1 Create Your Event

Through the Event Photos panel, you can upload your promotional visual, add your preferred watermark to appear on the photos, and include any required legal text. Within just a few minutes, your event will be fully set up and ready to go live.

## 2 Share Your Event with Participants

Provide your participants with the automatically generated QR code or sharing link for your event, allowing them to access the system quickly and effortlessly.

## 3 Upload Your Photos to the System

Upload your event photos to the system either privately or publicly; then make the photos accessible to all participants.

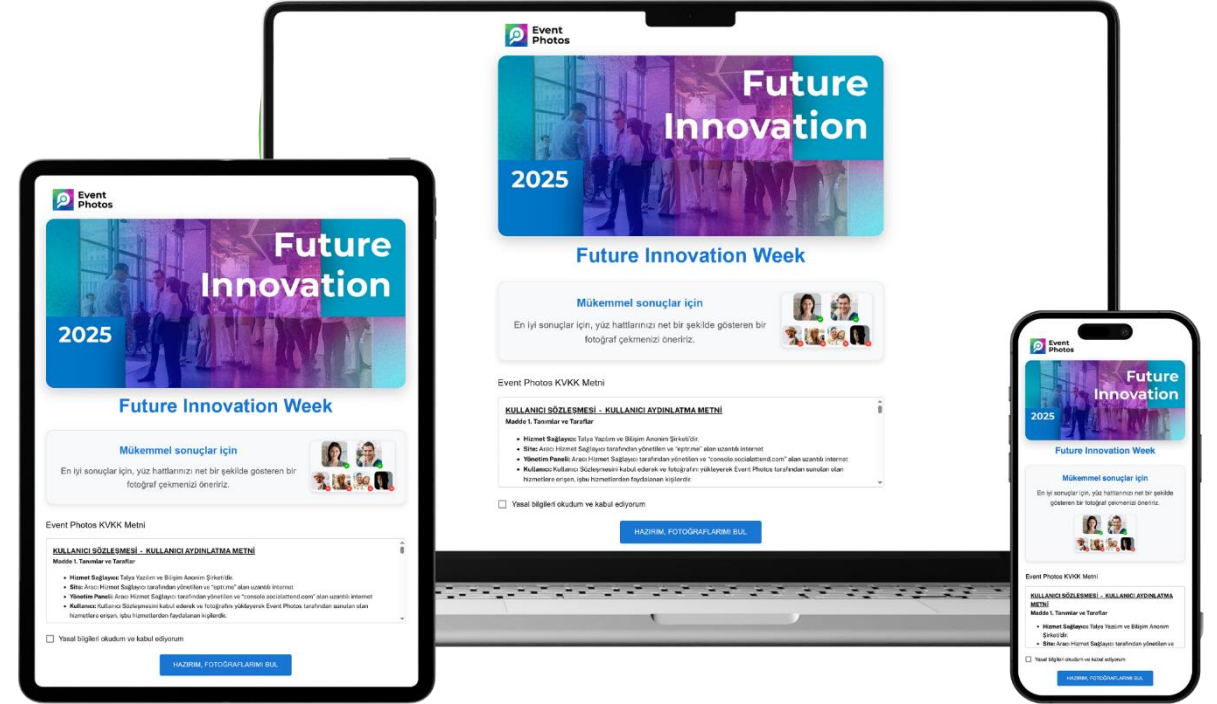

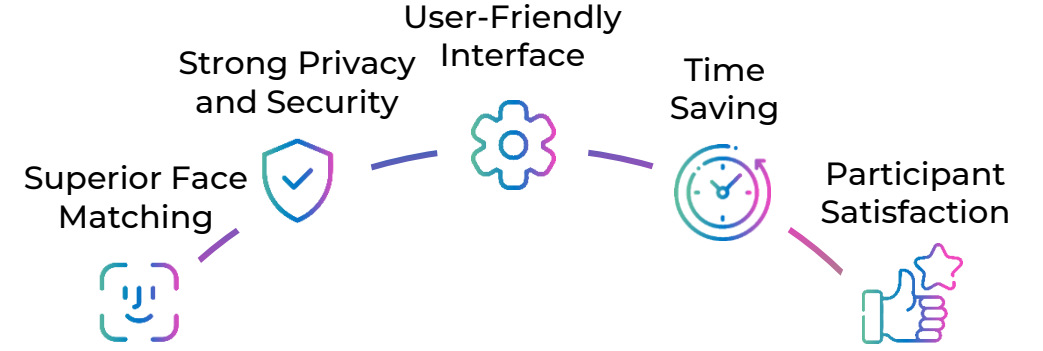

## 4 Make It Easy for Participants to Access Their Photos

Without needing to download any application, participants can access the event page using the QR code or sharing link you provide. By simply taking a selfie, they can securely and instantly view their personalized event photos.

# How Do Participants Access Their Photos?

Distributing hundreds of event photos to the right people is often a time-consuming and complex process.

Event Photos simplifies this experience with a seamless, fast, and secure system that requires no mobile app or additional platform. Participants can easily access their photos from any device, anytime.

My Photos

Public Photos

## Private Photos

Enhance participant experience and save time by delivering personalized photos quickly and securely!

The selfies uploaded by participants are automatically matched with the event photos in the system, ensuring that each participant receives only their own personalized images. This not only protects privacy, but also allows participants to access their photos effortlessly and instantly.

## Public Photos

Enhance participant experience and save time by delivering personalized photos quickly and securely!

All participants including those who could not attend the event can easily access the general event photos. This ensures that even individuals without personal photos can view the event visuals, allowing the overall event experience to be shared with a broader audience.

## Event Promotional Image

Create a strong connection with your participants through your event's promotional visual!

A well-designed event visual is a cornerstone of effective marketing strategies, offering a tangible and versatile medium for conveying information. Event Photos provides you with the opportunity to communicate your event's visual identity, story, and program to participants in a clear and impactful way.

## Branding

Add your logo to the photos to create stories and make your brand unforgettable!

By adding your brand logo or event-specific watermarks to your photos, you can transform every frame into a striking and authentic story that reflects your brand.

# Where is Event Photos Used?

Event Photos makes it effortless to deliver photos to the right people across all types and scales of events — from concerts and corporate gatherings to award ceremonies and sports organizations.
